Just Released in 2008

Vaccine Damaged Children: Treatment, Prevention, Reasons

This book examines what is possibly the most unrecognised public health problem in our community; the long-term impact of vaccination on the general health of children and adults. The book provides data which proves that vaccines cause damage, and shows the findings of Isaac's new "reverse" research quantifying the symptoms caused by specific vaccines. The homoeopathic treatment of vaccine damage is described in detail, including cases of both long and short term treatment. This is a book for practitioners of all modalities, but especially for homoeopaths. It is also a book for parents, and an Appendix introducing homoeopathic method is provided.

Special Price for the ANTA Conference: \$25.00

BOOKS ON HOMOEOPROPHYLAXIS

Vaccination & Homoeoprophylaxis? A Review of Risks and Alternatives. 6th edition, 2005 (revised 2007).

This is a complete rewrite of the 5th edition, with extensive new material in all sections. A new Section on the diseases covered has been added. Examines the risks and benefits of vaccination, with a full discussion of the homoeopathic alternative. Includes details of Isaac's research over 20 years, including his Doctoral studies, and the history of the homoeopathic alternative. The main reference book for parents and practitioners researching the area for the first time. A4 size, 262 pages.
