Based on the author's own cutting-edge research, this ground-breaking book takes an integrative approach to the treatment of fertility issues.

Combining Assisted Reproduction Techniques (ART) with Traditional Chinese Medicine (TCM) therapies and acupuncture, the author explains the scientific basis for the different methods and presents research on the successful use of alternative therapies to improve fertility and pregnancy rates.

This book will give TCM practitioners direct access to the vital specialist knowledge and technical information needed to treat their increasing numbers of patients with fertility problems effectively, and will provide Western doctors with new research in the field demonstrating the efficacy of acupuncture and TCM for treating fertility issues. Proven steps to get rid of aches and pains, and put the fun back in your life
