

Dear Members,

We have been approached by an organization, 10EQS, seeking to study to the supply and demand of dietary supplements in specific medical practices, including ours.

They have made a formal request for the active participation of our members and provided a survey for your responses. The survey is expected to take less than 10 minutes to complete.

In return, 10EQS is willing to make available the results of this study to our membership and anticipate that it will give you a view of which practices utilise supplements in the care and treatment of their patients and how it contributes to the revenue stream of those practices.

Furthermore, some survey respondents may receive a request for follow-up interviews, which are remunerated at US\$400/hr and are expected to last less than one hour.

The survey link follows:

<https://www.surveymonkey.com/r/dietarysupplementsurvey>

Survey closes: 28 September 2016

You can choose to participate at whichever level you feel comfortable. Our participation and support as a professional association allows us access to the final study, which we will share with our members.

If you have survey questions you may contact:
